CAMBODIA: PPWSA proposes KHR 330 dividend per share for 2025

State-owned public-listed enterprise Phnom Penh Water Supply Authority (PPWSA) has proposed a dividend per share of KHR 330 for 2025. The decision was taken at the board meeting of the company on Tuesday, according to a report released by the Cambodia Securities Exchange (CSX), yesterday. The total dividend payout will be to the tune of KHR28.7 billion and is derived from the annual profits of the company. The majority of the dividend—approximately KHR24.39 billion—has been allocated to the state, represented by the Ministry of Economy and Finance, reflecting the government’s controlling stake in the utility. Private

shareholders are set to receive KHR4.3 billion. Overall, the dividend payout ratio stands at 30.22 %, with 25.69 % attributed to the state and 4.53 % to private investors. Key dates include an expected ex-dividend date of June 11, 2026, followed by the record date on June 12. Payments are anticipated to be issued by June 25. The proposal remains subject to final approval at the company's upcoming 14th General Meeting of Shareholders, scheduled for May 29, 2026, at PPWSA headquarters in Phnom Penh. A separate extraordinary board meeting is also expected to formally confirm the state's dividend allocation. Earlier this year, PPWSA, which supplies clean water to Phnom Penh, Takhmao City and surrounding areas, reported a net profit of KHR 94.98 billion for the 2025 financial year, marking an 11.68 % increase from KHR 85.04 billion recorded in 2024, underscoring stronger operational performance and revenue growth at Cambodia's sole capital water utility.

Business & Economic News

CAMBODIA: Kingdom and Vietnam business chambers strengthen trade ties

Kampong Speu Chamber of Commerce and the Kampong Thom-Preah Vihear Chamber of Commerce signed a letter of intent with the Vietnam Chamber of Commerce and Industry in Ho Chi Minh City (VCCI-HCM), aiming to strengthen economic, trade, and investment cooperation between the 2 countries. The signing took place during a four-day visit by the Cambodia Chamber of Commerce (CCC) delegation to Ho Chi Minh City, Vietnam, from March 30 to April 2. The delegation was led by Leng Sokea, Vice President of the CCC, and also President of the Kampong Speu Chamber of Commerce. Heng Samnang, Vice President of CCC and President of the Kampong Thom-Preah Vihear Chamber of Commerce, also accompanied the delegation. According to a CCC news statement released on Friday, the signing ceremony was held on April 1 at the headquarters of VCCI-HCM, with the aim of fostering cooperation and enhancing bilateral trade and business relations. The 2 letters of intent were signed by Sokhea and Samnang with Tran Ngoc Liem, Director of VCCI-HCM, and representatives from the International Transaction Office. "These letters of intent reflect a commitment to establishing mutually beneficial cooperation between the business communities of Kampong Speu, Kampong Thom, and Preah Vihear provinces and Ho Chi Minh City, in line with shared interests in promoting trade and investment," read the statement. Expressing pleasure in leading the business delegation to Vietnam, Sokea emphasized that the goal of the trip was to seek opportunities for cooperation with Vietnamese businesses in key sectors. "Cambodia has strengths in agriculture with abundant alluvial soil, and also has a high demand for agricultural processing technology, especially in the vegetable and fruit sector, to increase added value." The VCCI-HCM appreciates the development potential between Vietnam and Cambodia, said a statement. Vietnam's export turnover to Cambodia is estimated at approximately \$5 to 6 billion, of which textiles and textile raw materials account for nearly \$1 billion. Conversely, Vietnam imports key products from Cambodia, such as cashew nuts (approximately \$1.5 billion), rubber (\$1 billion), and many other agricultural products, the statement added. Speaking at the meeting, Tran Ngoc Liem provided an overview of VCCI-HCM and the economic development situation in the southern region. He said that Ho Chi Minh City and its neighboring provinces account for approximately 55 % of total Foreign Direct Investment and over 40 % of total foreign investment in Vietnam, with over 400,000 operating businesses nationwide.

CAMBODIA: PM drums support for local products to build resilient growth

Prime Minister Hun Manet yesterday called on citizens for greater use of Cambodian products to build a resilient economy. In a message to mark the 9th National Day for the Promotion of Khmer Products (April 9), the Prime Minister stated that Cambodia has achieved rapid development through the implementation of the triangular strategy and the four-stage rectangular strategy, becoming one of the fastest-growing economies in Asia. "Within the ambition to transform domestic products into a strong driving force of the national economy, the Pentagonal Strategy – Phase 1 has outlined several key measures, including improving product quality and standards, creating new markets aligned with modern trade, enhancing the production capacity of small and medium enterprises, providing credit support to local businesses, establishing a Cambodian product identity system, and expanding opportunities to promote Cambodian products more widely," said Mr Hun Manet. He said that over the past one year, Cambodia has faced numerous challenges, including the global economic crisis as well as tensions related to the Cambodia-Thailand border situation, which have caused concern and required heightened vigilance. Mr Hun Manet went on to add: This situation highlights even more clearly the importance of peace and regional stability, which are essential foundations for economic development. Under the current circumstances, Cambodia needs strategies that can enhance domestic production capacity, create jobs, and increase added value in rural areas. The OVOP (One Village One Product) movement has actively contributed to transforming rural products into commercial goods, generating employment and income for families, preserving cultural heritage and traditional handicrafts, building

regional product identities, and empowering communities to manage businesses and enhance their own creativity, he said. “At present, we see that domestic products are becoming highly potential goods capable of meeting the needs of citizens and markets nationwide, while also encouraging people to change their behavior and increasingly build confidence in Cambodian products,” said Mr Hun Manet. “Using locally produced goods as a substitute for imported products is not only a way to support Cambodian producers, but also a demonstration of national pride and an appreciation of the value of products created through the effort and knowledge of the Cambodian people, while also promoting progress.” He called on all citizens to continue supporting Cambodian products with confidence in their quality and value. Such choices and support are a vital force in building a strong and resilient national economy capable of withstanding all kinds of challenges. “If we strive to produce and support consumption of our own products, our nation will prosper. I urge all producers to continue investing in innovation, improving quality, and developing new products that can meet both domestic and international market demands, while continuing to support policies and interventions aimed at strengthening investor confidence. “In particular, I would like to send a message to all Cambodian youth to strive to become innovators, creators, and leaders of the modern economy,” the premier said. Regarding Cambodian products, the Siem Reap Provincial Administration has urged relevant departments and institutions to organize the attractive exhibition booths to showcase Khmer products at the upcoming Kampong Thom Sangkranta event (April 9 to 16).

CAMBODIA: AMRO forecasts Cambodia to grow at 4.9%, surpassing ASEAN average

Cambodia’s economy is projected to grow by 4.9 % in 2026, outpacing the broader ASEAN average despite mounting global uncertainties, according to the latest outlook released by the ASEAN+3 Macroeconomic Research Office (AMRO). The forecast was unveiled during the ASEAN+3 Regional Economic Outlook (AREO) 2026 press conference yesterday in Singapore, where senior AMRO officials highlighted both the resilience of the region and the growing risks stemming from geopolitical tensions and economic disruptions. The virtual presentation was chaired by Yasuto Watanabe, AMRO Director and CEO; Dong He, AMRO Chief Economist; and Allen NG, AMRO Group Head and Principal Economist, and moderated by Daisy Wong. Watanabe opened the session by warning that the global environment remains highly volatile. He pointed to the ongoing conflict in the Middle East, now in its second month, as a major source of disruption to global energy markets. According to Watanabe, the situation underscores elevated policy uncertainty and its ripple effects across economies worldwide. “These shocks are reaching the ASEAN+3 region rapidly,” he said, emphasizing that this year’s AREO report—the 10th edition—comes at a particularly critical moment. He noted that an independent regional assessment is essential as policymakers navigate increasingly complex global dynamics. Despite these challenges, Watanabe stressed that the ASEAN+3 region—which includes Southeast Asian nations along with China, Japan, and South Korea—enters this period of uncertainty from a position of strength. He attributed this resilience to years of sound policymaking and strong regional cooperation. He also highlighted AMRO’s origins following the Asian financial crisis, which prompted the establishment of mechanisms for regional surveillance and financial stability. Among these is the Chiang Mai Initiative Multilateralization (CMIM), a \$240 billion financial safety net designed to provide liquidity support in times of crisis. AMRO officials noted that such frameworks continue to play a vital role in maintaining stability across the region. Presenting the “AMRO Staff Baseline Estimates and Forecasts 2026-2027,” AMRO Group Head and Principal Economist Allen NG reported that ASEAN economies are expected to grow by 4.6 % in 2026 and 4.8 % in 2027. The broader ASEAN+3 region is forecast to expand by around 4.0 % in both years. Within this regional context, Cambodia stands out. The country’s economy is projected to grow by 4.9 % in 2026, accompanied by an inflation rate of 2.9 %. Growth is expected to accelerate further to 5.2 % in 2027, with inflation easing to 2.5 %. These figures place Cambodia fourth among regional performers, underscoring its relative economic strength. Responding to questions from Khmer Times about Cambodia’s outlook and the factors that determine the country’s growth, AMRO Chief Economist Dong He credited the Kingdom’s effective management of external shocks in recent years. He noted that Cambodia performed strongly in 2025 despite significant disruptions caused by global tariff measures. “The United States remains Cambodia’s largest export market, and last year’s growth outcome was quite strong,” Dong said, describing the performance as a notable achievement given the scale of external pressures. Looking ahead, Dong emphasized that Cambodia’s ability to sustain growth will depend largely on how effectively it continues to manage external risks. While current threats appear less severe than the recent energy shock, vigilance remains essential. Energy security, in particular, was highlighted as a key concern. As a net fuel importer, Cambodia is vulnerable to fluctuations in global oil and gas prices. Dong suggested that diversifying energy sources and strengthening infrastructure would be critical steps toward ensuring a stable and affordable energy supply.

CAMBODIA: Labour Ministry, TAFTAC pledge stronger partnership to advance Cambodia's garment and footwear sector

Heng Sour, Minister of Labour and Vocational Training, met with Enjoy Ho, President of the Textile, Apparel, Footwear and Travel Goods Association in Cambodia (TAFTAC), and the association's newly elected executive committee to strengthen cooperation to further develop Cambodia's garment, footwear, and travel goods sector. The meeting, held on Tuesday at the ministry, focused on reinforcing partnership efforts to promote the continued growth of the labour sector, enhance competitiveness, and maintain export markets for Cambodian-made products. The garment, footwear and travel goods industry currently provide employment to around 1.2 million workers and supports nearly three million people indirectly, making it one of Cambodia's most important economic sectors. During the meeting, Sour praised TAFTAC for its strong progress and nearly three decades of successful operation, noting that the association has played a key role in driving the development of the sector. He also congratulated Ho on his election as TAFTAC president for the 17th mandate (2026–2028), expressing confidence that under his energetic leadership the association would further strengthen its unity and continue contributing to the growth of Cambodia's textile, garment, footwear and travel goods industries, as well as the national economy. The minister recalled that TAFTAC, formerly known as the Garment Manufacturers Association in Cambodia (GMAC), has long been a historical partner of the ministry, working closely with the government to address challenges and maintain stability in the sector. He noted that without the association's presence and cooperation, the industry might not have achieved its current level of growth. Sour highlighted that the strong partnership was built on mutual commitment, patience and respect, particularly during challenges surrounding the European Union's Everything but Arms (EBA) trade preference scheme. During that period, the association played a crucial role in supporting Cambodia's negotiations by highlighting improvements in labor conditions, freedom of association and the vital role of workers—especially women—in the sector. The minister also stressed that TAFTAC remains a trusted partner of the government, employers and workers through the tripartite negotiation mechanism, which provides dialogue platforms to maintain and improve working conditions, welfare and labor rights while safeguarding investors' legitimate interests. He noted that recently the association contributed significantly by coordinating with its members to provide an additional temporary travel allowance of \$2.50 to workers, on top of existing transport and accommodation support, during the global fuel price crisis. In response, Enjoy Ho expressed deep appreciation to Sour for taking the time to meet and for the ministry's continued support. He introduced the association's newly appointed leadership team and outlined its priority work agenda.

CAMBODIA: Returnee workers find opportunities through govt training scheme

Cambodian workers returning from Thailand are increasingly finding employment opportunities through government-supported training programmed, with thousands already placed in jobs across the country, officials and participants say. The seven-day training programmed, offered free of charge through the National Employment Agency (NEA), focuses on practical sewing machine operation and technical garment skills, preparing participants for immediate entry into factory work. According to Ministry of Labor and Vocational Training spokesperson Sun Mesa, of the more than 950,000 Cambodians who returned from Thailand due to border tensions last year, over 800,000 were migrant workers. Among them, more than 650,000 have secured employment, with over 330,000 in the formal sector and more than 320,000 in the informal sector, he said. Female worker Seng Thavann, aged 42, originally from Battambang province and a migrant worker in Thailand for 14 years, and currently working at a factory in Kampong Speu province, said: "Here, they train us in sewing and supervise our work. They provide us with one meal for lunch and accommodation for one week, with free lodging and free food. After seven days of training, they will employ us as full workers. In Cambodia, in the past we used to say there was a lack of jobs, but now there is no shortage at all. There are many jobs, because in every factory there is work available and they are all looking for workers. For those in Thailand who want to return, there is no shortage of jobs — our Ministry of Labor will find jobs for us. Working in our country is easier than working abroad because they do not force us. We work according to our ability. But in Thailand, they pressure us to complete work quickly. In Cambodia, there is no such pressure — we work based on our own capacity." I would like to call on our brothers and sisters in Thailand: if you want to return to Cambodia, please come back. There are many jobs here, and no one forces you like in Thailand. Work is based on your ability. There are all kinds of jobs available, as long as you have the strength to work, and there is no age restriction — if you can work, they will accept you." Meanwhile, worker Sum Vai, originally from Prey Veng province and also a migrant worker in Thailand, said: "I think it is good to learn sewing here for all workers returning from Thailand who do not have jobs. The trainers here take good care of us.
